Our COMFORT AIR 48W machine can effectively kill the inhalable bacteria and virus in the air up to 99%, with the current popular dynamic wind cycle UV lamp air disinfection technology. It has been very effective to prevent influenza and cross-infection.

UV disinfection technology is to break the DNA or RNA molecular structure in the microbial organism cells by appropriate wavelength UV radiation, resulting in the death of growing cells or regenerative cells, so as to kill the bacteria or virus. Based on the modern epidemic prevention science, medical science, and photo dynamics, UV disinfection technology will directly kill all kinds of bacteria, viruses, parasites, and other pathogen in the air by specially designed high-efficiency, high-intensity, and long-life UVC light radiation.

This machine is applicable to large size rooms It can be used in home, hotel, office, small meeting room, entertainment room, etc. with a few sterilization models including large air volume, sleeping, etc., will bring you clean air no matter working or sleeping.

Safety Precautions before Use

Please follow below safety precautions in order to avoid any hurt or financial damage to yourself or any other people:

1. Please do not turn on the machine before reading the manual carefully;

2. Please do not pull the power cord when removing or storing the machine (otherwise it may cause short circuit or inside broken of the cord and result in the fire or electric shock);
