Respected user:

Thank you for purchasing our negative ion air purifier. In order to ensure the maximum function of this product, please read this manual carefully before use and keep it for future reference.

Safety guidelines

Please read the following instructions carefully before using. This product is intended for home use and is intended for use only under normal operating conditions and must be used in accordance with the following guidelines.

⚠ WARNING

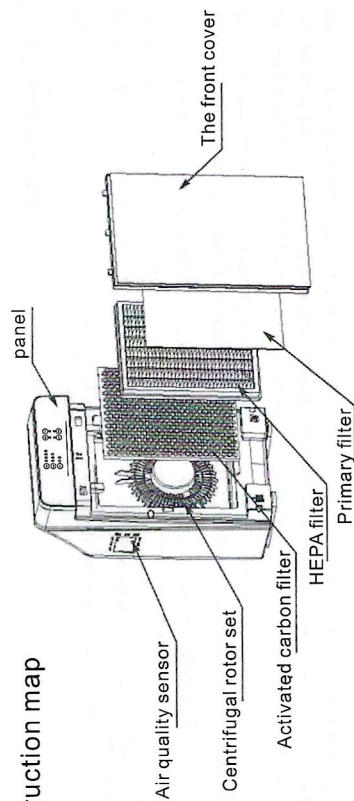

1. Do not allow the product to come into contact with water, or insert/push the plug with water.
2. Do not use water, liquids, detergents or any flammable materials to clean or spray on this product.
3. Do not block the air inlet and outlet.
4. Do not use the power extension cord unless approved by the local authorities. Do not use this product when it is damaged.
6. Do not attempt to dismantle, repair or modify the equipment.
7. If you do not use the product for a long time, please unplug the power cord.
8. Do not use this product in an environment with large temperature changes.
9. If the product is abnormally sounding, burning smell, or smoke, please remove the power plug immediately and contact the technical support center.
10. If the plug does not fit into the outlet, contact a qualified person to install a suitable electrical outlet. Do not change the plug or use the adapter plug.

⚠ SAFETY PRECAUTIONS

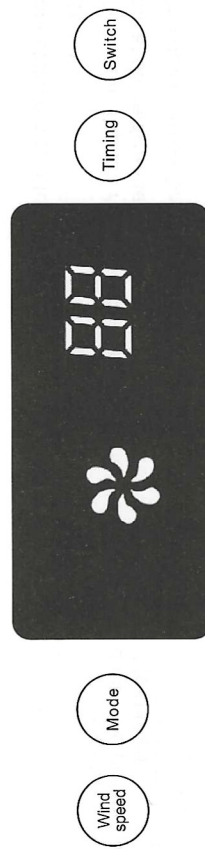

1. Place the voltage indicated on the nameplate to ensure that the power plug is connected to the correct power outlet.
2. If the cord is damaged, it must be replaced by the manufacturer or a qualified service agent.
3. Please ensure that the power socket is connected properly, the plug will not load and run hot.
4. Please ensure that the product and the adjacent walls or items are at least 20 cm away, and the upper vents are at least 30 cm.
5. Only use the original filter designed by our company for this product. Do not use any other filter. Do not push, lean, squeeze, bump or insert sharp objects into any part of the product.
6. Turn off the power before cleaning or maintaining the product.

Installation Guide

First Time Using

1. Read the instruction manual carefully and save it for future reference.
2. Remove all packaging and clean all removable parts with a soft, dry cloth.
3. Place the product on a dry, stable and smooth level and ensure that the product provides a reasonable space of no less than 20 cm for proper operation.
4. Before inserting the plug, please check that the power socket and extension cord have been confirmed to meet the product requirements.
5. When using the negative ion function of this product, in the extremely quiet situation, there will be a slight "ZiZi" strictness, which is normal phenomenon, because the negative ion generator is working, releasing a large amount of negative ions.

Instructions For Use

Connect the product to a suitable power outlet and be ready.

1. On/off

Power on: Tap the remote control on/off button to start the product. The product will run at the mid-range wind speed by default each time the product is started.

Shutdown: Press On/Off again to turn off the running product.

2. Wind speed selection

Select the desired wind speed by mode.

- 1) General mode operation: When the flow of people is small, it is recommended to use mid-range wind speed.
- 2) Quiet mode operation: Low wind speed is recommended.
- 3) High-efficiency mode operation: When indoor pollution is high or there are many people, it is recommended to use high-grade wind speed.

3. Timing setting

There are 4 time selections for 2H, 4H, 6H, and 8H at regular intervals, and the indicator lights correspond to the corresponding time.

4. Negative ion switch, after the button is pressed, the negative ion indicator lights.

Cleaning And Maintenance

1. Unplug the power supply before cleaning the filter.

2. Cleaning product body

Use a soft, dry cloth to clean the dust and dirt on the surface. Tip: If the contamination is serious, use a damp cloth to gently wipe off the surface, but do not use rough materials.

3. Cleaning product inlet and outlet

Use a soft brush to remove dust that has accumulated in the air inlet and outlet.
